

# MATERIALS

## VINYL : BANNER : TEXTILE

---

We have a specific type of vinyl for every application: floors, ceilings, walls, & even a swimming pool if you'll let us!

We carry an elite line of 3M materials that withstand some of the harshest elements & show amazing image quality. Whenever possible we purchase recycled vinyl & do our part to make sure that all materials are disposed of properly.

Brands Imaging is committed to responsible printing. We use Eco Solvent inks that are heavy etching to give you an amazing, long lasting image, & that are also much safer for the environment with low VOC levels.

Our banner material comes in many shapes & sizes.

Banners have picked up negative associations over time for being slouchy & sagging, we can assure you that this couldn't be further from the truth.

Our banner materials are all wind rated for 90mph & fire retardant. We print on smooth, scrim, & mesh.

In doing our part to make the printing business more environmentally friendly we offer a wide range of natural &/or recyclable textiles. We encourage our customers to take advantage of our resources when purchasing signage, doing promotional work or bringing amazing art to the masses.

Please contact us to learn more about printing on everything from polyester to poplin.
